## Mockup:

## Persona:

**Maud Leonard**

*"The preparation for the ritual is the ritual."*

**Personal Detail**

Age: 21

Location: Birmingham, UK

Family Status: Single

Education Level: Undergraduate

Subject: History of Art

Personality: Introversive

Accessibility: None

### BIO

Maud is an international student. He is a freshman in the family of university. During the period of studying, he does not want to merely focus on academic career, as well as, meet more new friends and learn some useful skills.

### Frustration

- He does not know which is his favourite hobby.
- He needs to depend on others to introduce to social contact.
- He feels nervous when he is talking, especially meeting with strangers.

### Goal

- Desire to push himself to be sociable.
- at least attend social groups at university.
- Meet some friends who have the same interest.

### Favourite Apps

### Favourite Phone Brand

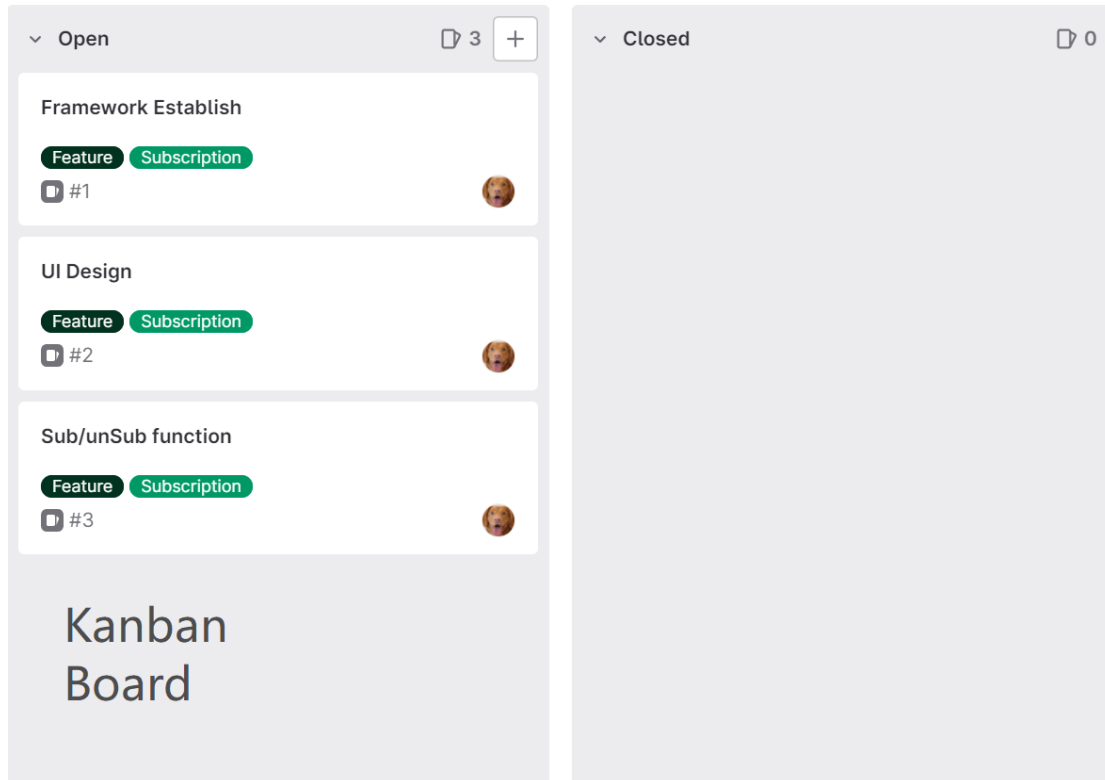

### Technology Capacity

## teamproject

---

### Developed by:

---

Muhammad Haseen Rehman

Zepeng Zhao

Madasar Shah for the team project

This application was generated using JHipster 7.9.3, you can find documentation and help at <https://www.jhipster.tech/documentation-archive/v7.9.3>.

### Project Structure

---

Node is required for generation and recommended for development. `package.json` is always generated for a better development experience with prettier, commit hooks, scripts and so on.

In the project root, JHipster generates configuration files for tools like git, prettier, eslint, husky, and others that are well known and you can find references in the web.

`/src/*` structure follows default Java structure.

- `.yo-rc.json` - Yeoman configuration file JHipster configuration is stored in this file at `generator-jhipster` key. You may find `generator-jhipster-*` for specific blueprints configuration.
- `.yo-resolve` (optional) - Yeoman conflict resolver Allows to use a specific action when conflicts are found skipping prompts for files that matches a pattern. Each line should match `[pattern] [action]` with pattern been a `Minimatch` pattern and action been one of skip (default if omitted) or force. Lines starting with `#` are considered comments and are ignored.
- `.jhipster/*.json` - JHipster entity configuration files
